DO YOU HAVE TATTOO REGRETS?

You aren't alone! **20% OF PEOPLE** with a tattoo have thought about removal options.*

In the past, tattoo removal was painful and gave inconsistent results. The Alma Q-Switched Laser with "Next Generation" technology now provides a **SAFE AND EFFECTIVE** way of removing tattoos leaving natural looking skin.

**Harris Interactive, 2014*

TOP 10 REASONS TO REMOVE A TATTOO

1. To get ahead professionally
2. To remove the name of a former flame
3. To clear the slate for a new tattoo
4. To eliminate a misspelled word
5. To join the military
6. To appease your significant other
7. To finally get your mom off your case
8. To look perfect on your big day
9. To eliminate an image that has lost its significance
10. _____

FREQUENTLY ASKED QUESTIONS

HOW DOES THE Q-SWITCHED LASER WORK?

The Q-Switched Nd:YAG laser using "Next Generation" technology delivers high energy light pulses.

These pulses are then absorbed by the tattoo breaking down the pigment into tiny particles for the body to remove naturally.

WHAT KIND OF TATTOOS CAN BE TREATED?

- ~ Professional and amateur tattoos
- ~ Traumatic tattoos resulting from accidents
- ~ Cosmetic tattoos

CAN THE Q-SWITCH LASER REMOVE ALL COLOR TATTOOS?

The Q-switched Nd:YAG Laser works best on:

- | | |
|--------------|----------|
| ① Blue | ④ Red |
| ② Black | ⑤ Green |
| ③ Blue/Black | ⑥ Yellow |

HOW MANY TREATMENTS WILL I NEED?

The number of treatments may vary depending upon the size, color and location of the tattoo. Your treatment provider will work with you to develop a treatment plan.

WHAT CAN I EXPECT DURING THE TREATMENT?

Pain tolerance varies from person to person. Many describe the treatment as a rubberband snap to the skin. Although no anesthesia is required, topical anesthetic can be requested for sensitive areas.

WHAT CAN I EXPECT AFTER THE TREATMENT?

Your provider will give you specific post-treatment instructions. While your skin may be slightly red immediately after the procedure, this should resolve within a few hours. You can resume your normal activities immediately following the treatment.
